SUMMARY

Motivated cybersecurity enthusiast focused on Identity and Access Management (IAM) and VAPT, with a long-term goal of mastering cloud security. Driven by a passion for identifying system vulnerabilities and implementing effective defenses. Actively building hands-on experience through labs and simulations, and seeking an entry-level role to solve real-world security challenges alongside experienced professionals.

TECHNICAL SKILLS

- Programming: Python, Java, JavaScript
- Networking: TCP/IP, DNS, HTTP/HTTPS, Firewalls, VPN
- Tools (Learning): Kali Linux, Nmap, Wireshark, Burp Suite
- Learning: IAM, VAPT

PROJECTS

Cloud IAM Attack Path Lab | Keycloak, Docker, Python, IAM, RBAC

- Built a practical IAM lab to understand authentication, authorization, role-based access, and privilege escalation scenarios.
- Simulated identity security risks and analyzed security events while applying least-privilege and Zero Trust concepts.

FinGuard — AI Financial Decision Advisor | Python, AI

- Built an AI-assisted financial decision advisor for the "Buy or Wait?" problem, generating personalized recommendations from user financial profiles and spending preferences.
- Designed a structured decision pipeline that analyzes spending categories and produces explainable buy/wait recommendations, with automated evaluation across 250 decision cases.

Cybersecurity Foundations Lab | Kali Linux, Nmap, Metasploitable2, DVWA

- Built a hands-on cybersecurity laboratory covering reconnaissance, vulnerability assessment, network enumeration, and web application security testing.
- Practiced security testing against controlled lab targets including Metasploitable2 and DVWA, documenting findings and security observations.

EDUCATION

- Master of Computer Applications (MCA)
  Gandhi Institute of Excellent Technocrats | 2024–2026 | SGPA: 9.25
- Bachelor of Science in Mathematics
  Mahima (Degree) Mahavidyalaya, Joranda | 2024

INTERNSHIP

Cybersecurity Intern — ThreatSys | 2 Months

- Learned practical cybersecurity concepts including network security, firewalls, system vulnerabilities, and basic security testing.
- Worked with Kali Linux and studied common web vulnerabilities such as SQL Injection and XSS.

Data Analyst Intern — CTTC, Bhubaneswar | 2 Months

- Analyzed real-world datasets, identified patterns, and created reports and visualizations.

CERTIFICATIONS

- Palo Alto Networks Cybersecurity Professional Certificate — Network, Cloud Security & Security Operations
- Tata Cybersecurity Analyst Job Simulation — IAM Fundamentals & IAM Strategy
- TryHackMe Advent of Cyber 2025 — 24 Cybersecurity Challenges
- Deloitte Cyber Job Simulation — Cybersecurity Practical Tasks
